

PREPARATION FOR COLONIC TRANSIT TIME TEST

Please follow the patient preparation instructions below.

Day I – take two capsules – at any time during the day

Day II – take two capsules – at the same time as on Day I

Day III – take two capsules – at the same time as on Day I and Day II

Day IV – abdominal imaging is performed while you are lying on your stomach so that all the markers are shown. It is necessary to perform the imaging at the time when you took the capsules

Day VII – abdominal imaging is performed while you are lying on your stomach so that all the markers are shown. It is necessary to perform the imaging at the time when you took the capsules

Day X – abdominal imaging is performed while you are lying on your stomach so that all the markers are shown. It is necessary to perform the imaging at the time when you took the capsules

IMPORTANT: Please do not take any laxatives (fibres involved in bulk-forming, suppositories and enemas) until your doctor tells you that the examination is complete.

Do not change your usual diet (food and drinks) during the test.
